

# Enterprise Technology Solutions

**ACCELERATING TRANSFORMATION**

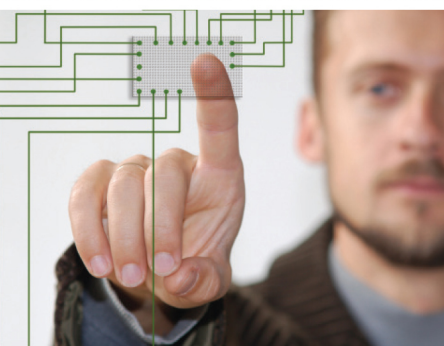

## Fulfilling Technology's Promise

Technology provides lasting advantages in efficiency and performance—but only when properly aligned and integrated.

Managers today are tasked with driving costs out of IT while increasing service levels across the enterprise. Competition for skilled IT professionals capable of doing more with less remains fierce and shows no sign of slowing down. These challenges often lead to conflict, delays in progress, and missed opportunities for Government agencies.

Xcelerate's Enterprise Technology team will leverage your existing technology and combine it with our expertise and industry standards to create solutions that unlock your organization's potential. We seamlessly integrate your personnel, operating environment, and culture with solutions that fulfill your technology's promise and help you gain a lasting advantage.

### Are you an Agency:

- Trying to create an Enterprise Architecture to align Business and IT?
- Looking to integrate disparate systems to share services and data or needing to consolidate infrastructure assets?
- Implementing web and mobile application solutions that enable key business processes?
- Needing to consolidate infrastructure assets and services to do more with less?

If you answered "yes" to any of these questions, you could benefit from Xcelerate's ET Solutions. Contact us to learn more and arrange an Xceleration Assessment™ to move your organization forward.

**"Xcelerate resources often provide a best practice approach for the organization which helps in the long term view. They are very good at listening to the customer requirements, delivering on those requirements and making strategic recommendations for long term and sustained improvements."**

**- Former AKO PMO Manager**

### Keep Your Mission Moving Forward

We are driven to eliminate obstacles that keep our clients from accelerating towards optimal results. Xcelerate's Enterprise Technology (ET) team focuses on the bottlenecks that impede agency-wide IT progress. From modernizing legacy systems and cost-effectively deploying new complex applications to protecting information assets and transforming data centers, we accelerate the integration and delivery of technical solutions aligned to your agency's strategic needs.

Xcelerate creates flexible and customized solutions that get measurable results. Our services, solutions, and dedication will accelerate your transformation to a 21st century Government agency.

## Leadership Throughout the Lifecycle

Our IT experts will rapidly design flexible technology solutions that move your business forward. We expedite results by combining innovative approaches with industry best practices in architecture, requirements, design, development, testing, delivery, and management. From website, mobile, and business applications to modernizing legacy systems to cost-effectively deploying new, complex applications, we accelerate integration and delivery of solutions aligned to your strategic business needs.

Xcelerate delivers customized and controlled agile solutions that satisfy agency needs and Federal security regulations while seamlessly integrating with your personnel, operating environment, and culture. We help accelerate the IT strategy and architecture of large, complex projects and help you understand and cost-effectively transform your IT infrastructure and data centers to meet your mission-critical goals.

## Core Competencies

Xcelerate has a proven record of unlocking potential for:

- DIA
- DISA
- DLA
- DMDC
- FBI
- ODNI
- TSA
- U.S Army

### Web and Application Development

- Intranets & Portals
- Mobile Web & App solutions
- User Experience
- Requirements management
- Test planning & execution
- Web Content Management
- Database Design
- PMO Strategy

### SOA, Cloud, and Mobile

- IT Strategy and Architecture
- Solution Design
- Cloud Computing
- Data Management
- SOA Architecture
- Semantic Web
- Legacy Modernization
- Shared Service
- Architecture Solutions

### Information Assurance & Cyber Security

- Security Planning and Implementation
- Certification & Accreditation
- Computer Forensics
- Penetration & Vulnerability Testing
- Infrastructure Defense Planning
- Awareness Training

### IT Service and Asset Management

- Data Center Consolidation
- IT Service Management
- IT Governance
- Asset Management
- Infrastructure Solution
- Virtualization
- Discovery & Planning
- Business Continuity & Availability

## About Xcelerate

Xcelerate Solutions is a business acceleration company that focuses on helping clients achieve their BEST performance in four key areas: Business processes, Enterprise technology, Strategy and policy, and Talent. It is some combination of these four key elements that are the root cause of most business bottlenecks and issues, and Xcelerate specializes in breaking through these barriers to deliver program success. Xcelerate Solutions – unlock your potential.

## Select Case Studies

### Defense Information Systems Agency – Field Security Operations (FSO)

Xcelerate assisted DISA in providing IA services to the DoD enterprise, including security protection, operations, and training; ongoing management of the IA Certification and Accreditation Process (DIACAP); and proactive education on cyber security techniques and tools. We helped DISA provide technical and physical IA controls to DoD enclaves, systems, and programs worldwide. Our IA services accelerated DISA's vision and helped FSO to become the single Certifying Authority for DISA and to sustain effective protection for the Defense Information Infrastructure (DII).

### U.S. Army – Army Knowledge Online (AKO)/Defense Knowledge Online (DKO)

AKO is the U.S. Army's information portal, supporting more than 2.4 million users including military service members and families, defense personnel, and defense contractors. This cloud-based portal provides mission-critical services to the daily operations of users across the globe. Xcelerate helped the Army optimize their technology and resources by re-engineering their business process objectives to align with delivery IT services and implementing measurable performance processes. The implementation of our consultants' recommendations increased overall service availability by 75%, decreased unplanned system changes by 5%, and increased overall information assurance compliance through systemic implementation of continual and targeted improvements.

### Defense Logistics Agency - 3in1 Tool

Xcelerate provided thought leadership, systems engineering, and development services for the DLA in the development of a hand-held device for warfighters to better control cash on the battlefield and automate the SF-44 process for ordering, receiving, and paying for goods and services in the field. Xcelerate helped to deliver the first approved mobile-based acquisition solutions for the Department of Defense. The 3in1 Tool also decreases the need to send field purchase personnel into harm's way to obtain field supplies and services in theater and increases the flexibility in the number of combat personnel deployed for in theater footprint. The tool is currently providing support in theatre to warfighters deployed to Iraq, Afghanistan, and the Horn of Africa.
